

# PUREFEED

A REVOLUTION IN AQUACULTURE

## VELOX™

Velox is a 100% organic solution designed to enhance aquaculture practices, focusing on both shrimp and fish farming. By promoting rapid phytoplankton bloom within just three days, it ensures a clean pond environment rich in dissolved oxygen, which is essential for healthy aquatic life. The use of Velox reduces the necessity for probiotics, antibiotics, and aerators, leading to significant cost savings and a more sustainable farming operation. Additionally, its application minimizes water exchange requirements and is effective across all climate conditions, making it a versatile choice for aquaculture farmers. Overall, Velox not only supports healthier fish growth but also contributes to a more efficient and eco-friendly aquaculture system.

# PUREFEED

A REVOLUTION IN AQUACULTURE

## AQUA BOOST - LIQUID

Velox is an **organic solution** for aquaculture which reduces production cost and focuses on delivering high quality produce with **higher survival rates** in almost all climatic conditions resulting **higher profit margin** for farmers while ensuring sustainability.

 **PUREFEED**  
A REVOLUTION IN AQUACULTURE

Nothing Artificial

Earth Friendly

## Bene<sup>?</sup>fits

Organic product, derived from natural resources

Increases density of cultivation

FCR is restricted to  
 $\leq 1$

Plenty of dissolved oxygen is made available

Increasing DO Level up to 18mg/Ltr\*

Water Exchange is not required

Higher survivability & improves FCR

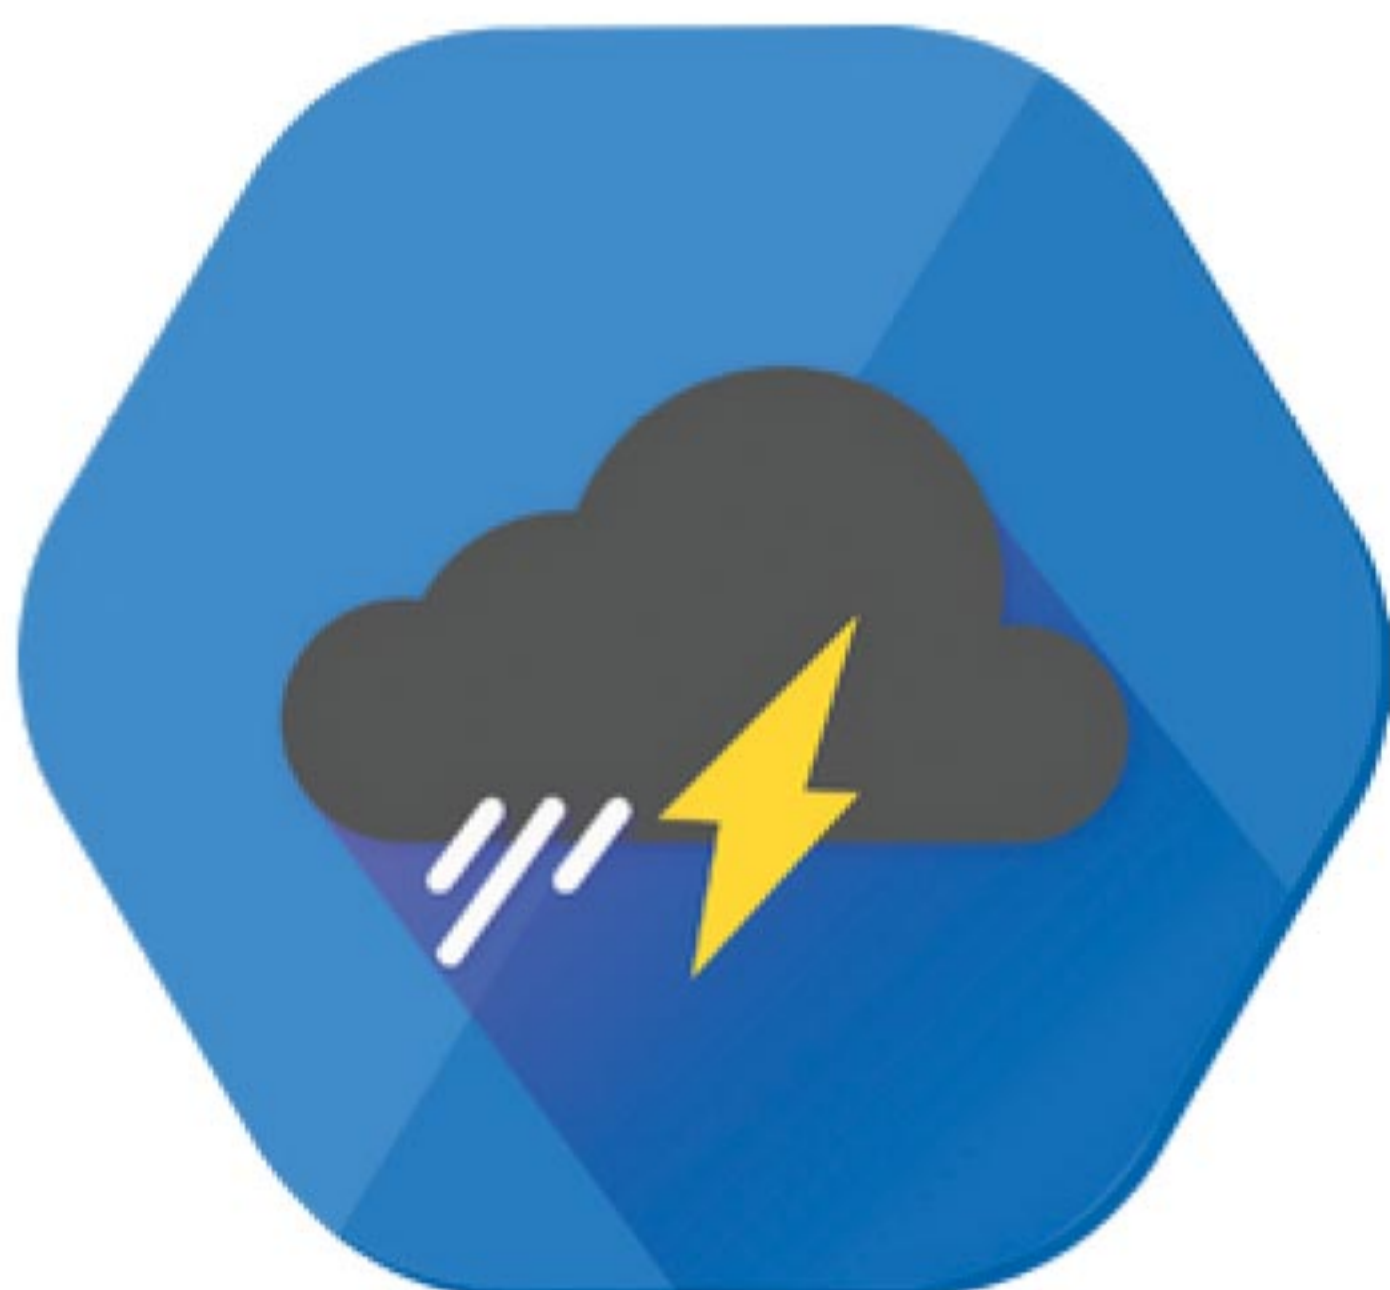

Suitable for all climate conditions

Maintaining pH of water

Keeps pond free from Ammonia, hydrogen sulphide and vibrio predators

Reduces usage of probiotics and antibiotics

Pool carbon dioxide from the atmosphere

Overall cost of production is reduced

Higher stocking density

Increases immunity leading to higher survival rate with LD80 disease challenge

\* Under Controlled Conditions

**VELOX**

Saves power, labour  
and water  
besides improving  
the survivability

**Basal Dosage** (At pond preparation - around 12 days before stocking PL12) :

1. Apply 1200 - 1500 Kg Vermi Wash\* or Biogas slurry (dried or wet) per Hectare.
2. Add 5 to 10 MT Azolla for better results (dried - if available).
3. Apply VELOX Liquid after filling water at 5 Ltrs per Hectare mixed with 40 Ltrs water for every Litre of application.

Vermi Wash can be added for rapid multiplication and make a pollution free pond.

\* Preparation of Vermi Wash : Add 1 Ltr water into 1.5 Kg Vermi Compost & stir thoroughly. Filter it after 4-5 hrs.

**Additional Dosage** (After 5 days to maintain the density) :

1. Apply 250 - 400 Kg Vermi Wash or Biogas slurry (dried or wet) per Hectare.
2. Apply VELOX Liquid after filling water at 3 Ltrs per Hectare mixed with 40 Ltrs water for every Litre of application.

**Regular Dosage :**

Prawn (Shrimp): 10 Ltr per Hectare (Basal Dose) & repeat application is 5 Ltr per Hectare every 7 days.

Fish: 10 Ltr per Hectare (Basal Dose) and repeat application is 5 Ltr per Hectare every 14 days.

**The Method of use :**

1. Spray agricultural lime at 30 - 45 Kg per Hectare in the early morning hours (preferably before sunrise).
2. Mix 5 Ltr VELOX Liquid with 200 Ltr water and spray all the corners (inside layer) of the pond before sunrise.
3. Add 5 Kg Vermi Wash & 50 Kg Azolla Juice to get better results.

Note: If the oxygen level is decreasing then add VELOX 3 Ltr per Hectare to maintain level.

**Shelf Life :**

5 years from the date of mfg.

**Packing Details :**

VELOX AQUA BOOST - LIQUID is available in 5 Ltr HDPE Jar and Such 4 X 5 Ltr Jars are repacked into Corrugated Box.

VELOX AQUA BOOST - LIQUID is also available in bulk packing of 55 Ltr Carboy & 210 Ltr HDPE Barrels.
